Customer Order Point

The Quail Customer Order Point encompasses the latest criteria in drive-thru speaker systems.

Finished to customers' choice of colour and constructed in 10 gauge (3mm) coated aluminium, the Order Point is professional and robust. The interior has been acoustically designed, optimising inbound and outbound audio quality. The design supports simplex and duplex sound systems.

To minimise the effect of noise created by rain, wind and vibration the internal surfaces are lined with 19mm styrofoam sheeting. The Order Point stands on a 10mm thick mild steel base plate which locates onto a foundation cage sunk into concrete.

The 'Order Here' panel is illuminated and backed with opal polycarbonate sheeting. Available in any language.
