patrons can instantly
contact gaming staff

PokieCall allows instant communication between patrons and gaming staff

Jtech provides the ideal solution for Gaming Paging communications in Pubs and Clubs. The Jtech PokieCall System has been developed to provide direct communications between staff and the gaming room patrons.

The PokieCall System is ideal for venues not equipped with a GamingLoyalty System, and provides full alphanumeric paging to the gaming floor.

The PokieCall system features:

- Real-time Communication between patrons and gaming staff
- Improved customer service levels
- No loyalty system required
- Full alphanumeric messaging
- Reduction in machine down times
- No computer or software required
- Superior 4 watt transmitter for high quality in-building coverage
- Supports over 700 gaming machines
- Improve staff awareness and efficiency
- Full training and support
- A range of pagers available

System Specifications:

- 2, 4 or 8 Line Alphanumeric Pagers
- Easy to read alphanumeric text
- Rugged and reliable design
- Bright backlight display
- VHF and UHF Frequencies
- Low Battery Indication
- Supports up to 12 Hardwired Alarms, eg Duress Buttons, Fire Panel, etc
